MAKE YOUR BIOGAS-DESULPHURISATION PLANT MORE **ECONOMICAL** AND **SAFER** TO OPERATE – WITH WITT NON-RETURN VALVES

ANDREW SMART, HEAD OF SALES GAS SAFETY EQUIPMENT – WITT-GASETECHNIK

Installing WITT's ultra-low cracking pressure NRVs on the air feed into your digesters, biogas pipework, carbon filters, etc. makes your plant ...

More economical

- **Reduced capital costs** – with WITT Non-Return Valves you have the lowest possible pressure drop between the compressors and the vessels, so you can use smaller duty compressors and smaller bore pipework.
- **Reduced operating costs** – reducing the duty of the compressors will use less electricity.
- **Reduced maintenance costs** – WITT's high quality Non-Return Valves in brass and stainless steel withstand corrosion, reduce maintenance and last longer.

Safer to operate, reducing your risk and your customers' risk

- **Ultra-reliable leak-tight re-seating** – preventing any risk of back-flow of biogas when the compressor stops. 100 % tested in accordance with EN730-2.
- **Independently certified** – by DVGW (the German Technical and Scientific Association for Gas and Water).

Benefit straightaway

- **Easy to retrofit** – WITT NRVs can easily be retrofitted into existing pipework systems, giving you extra revenue from your existing customers. Full range of connections available. Can be mounted in any direction/orientation.
- **World-wide availability** – via WITT's global subsidiaries and partners.

WITT. Safety. Efficiency. Certainty. World-wide.

OUR PRODUCT RANGE

GAS CONTROL EQUIPMENT

Gas mixing systems
Gas metering systems
Gas analysers
Leak detection systems
Gas pressure vessels
Engineering of customised systems

GAS SAFETY EQUIPMENT

Flashback arrestors
Non-return valves / check valves
Quick couplers
Safety relief valves
Stainless steel devices
Gas filters
Pressure regulators
Outlet points
Lance holders
Ball valves
Automatic hose reels
Test equipment
Accessories
Customised safety equipment
